1983 EDITION

UNITED STATES INDEPENDENT TELEPHONE ASSOCIATION

The United States Independent Telephone Association was organized in 1897 for the purpose of promoting the general welfare of the individual firms and corporations engaged in providing Independent telephone service in cities, communities and rural areas in the United States and its territories as well as the manufacturers and suppliers of equipment and material needed to meet these service requirements. The Association was incorporated under the laws of the state of Illinois in 1915.

One of the activities engaged in by the Association in serving its members is that of publishing annually a volume containing statistical data and other information relating to the Independent telephone industry.

The format and extent of the statistical data and other information have been changed from time to time in order to enhance the usefulness of this publication.

We wish to express appreciation to those companies which have contributed to the publication of the volume by submitting underlying operating data and other information.

SCOPE

The information contained in this Annual Statistical Volume is based on information submitted to the United States Independent Telephone Association by 754 companies (Class A 715 and Class B 39). These companies represent the following percentage of the total Independent telephone industry.

Companies	52.65
Exchanges	87.24
Employees	96.89
Access Lines	97.57
Plant	97.94
Operating Revenues	96.87

For its accounting purposes the Federal Communications Commission has established the following classifications based on annual operating revenues:

Class A	$250,000 and over
Class B	$100,000-$249,999

Due to variations in the number of companies reporting for the periods involved, as well as changes in individual company classification, care should be exercised when making comparisons based upon data contained herein.

Information relating to telephone development in areas served by the Bell System and certain other data have been furnished by the American Telephone and Telegraph Company.

Facing Change

"PhoneFacts '83" tells you about a new system of paying for long-distance service. Recent "PhoneFacts" have reported on other aspects of deregulation and competition. Divestiture of the Bell System operating companies from the American Telephone & Telegraph Co. adds another major dimension of change. In January 1984 all these new pieces of the national telephone picture are scheduled to be in place. You will have a new world of telephone service.

This prospect makes it important to restate the position of your Independent local exchange telephone company.

Your telephone company opposed many of the regulatory changes that are taking place. Not because we oppose competition as such, but because we believe the impact of the changes on consumers was not researched or understood.

The industry's views did not prevail among federal regulators. The industry sought congressional legislation to set proper guidelines. No legislation has been passed.

Yet these changes are becoming facts of life. What is the independent companies' policy now.

It's simple. To emphasize strongly the good things--greater choice in equipment and service arrangements, availability of new technology. To try to minimize the results consumers don't welcome—such as higher local rates, complexities in service arrangements, possible threats to the quality of service.

Our basic policy really remains the same: to provide the best service at the least cost possible. This is our pledge to you. We invite you to discuss your opportunities and questions with your local telephone company.

A Message from Robert M. Pirnie
President, USITA

VITAL FACTS ABOUT THE INDEPENDENT COMMUNICATIONS INDUSTRY

- Independents now number 1,432 companies with 192,100 employees. During 1981 due to consolidations there was a decrease of 27 operating companies.
- Access Lines now served by Independents number 21,671,900, about one of every five in the United States, in 11,074 exchanges serving about 59% of the nation's geographic service area.
- Investment in plant and facilities is now $41 billion and total plant investment is the equivalent of $215,513 per employee. About $4.7 was spent in 1982 for upgrading service and facilities estimated for 1983 $4.4 billion.
- Independent Revenues in 1982 climbed the 13.7 per cent to $13,880 billion, an increase of $1,674 million over 1981. This compares with an increase in Bell System revenues of 10.6 per cent.
- Growth has been a hallmark of the Independent industry since the end of World War II. Gross revenues have grown at an average annual rate of 13.9 per cent since 1973 compared with Bell's 11.9 per cent.
